

Specialist / Scientist Process Analytics (m/f)

Fresenius Kabi is a global healthcare company that specializes in lifesaving medicines and technologies for infusion, transfusion and clinical nutrition.

With our corporate philosophy of "caring for life", we are committed to putting essential medicines and technologies in the hands of people who help patients and to finding the best answers to the challenges they face.

In the field of biosimilars, we develop products with a focus on autoimmune diseases and oncology. Fresenius Kabi SwissBioSim GmbH is specialized in biosimilar medicines and consists of an experienced team of employees located in the Geneva region of Switzerland. As in all our ranges, Fresenius Kabi is committed to provide high-quality and affordable products for the therapy and care of critically and chronically ill patients.

Your assignments

- Operate a Process Analytics laboratory in support of biosimilars development
- Be responsible for all aspects of method development, sample preparation, data acquisition, data analysis, and data interpretation using software platforms
- Further involve in training of operators, robot's maintenance, method improvements, providing project support, effectively communicating project progress, writing and updating of operating procedures, authoring of analytical reports, and maintaining, updating and troubleshooting instrumentation
- Contribute in the planning of experiments and delivery of results according to budget and project timelines

Your profile

- University degree in analytical biochemistry or related field of study or equivalent profound experience in process analytics after technical certifications
- Relevant work experience in process analytics in the pharma or biotech industry
- Strong background in automation and liquid handling (AssayMap BRAVO, PhyneXus) and relevant experience in protein/mAb analytics
- Experience with experiments such as protein A purification, glycan mapping, low/high molecular species analysis, and charge variant profiling preferred
- Knowledge of mass spectrometry and scripts programming would be assets
- Ability to work accurately, with attention to detail, in a highly organized manner
- Team worker and maintaining a highly motivating working atmosphere
- Good communication skills, both oral and written
- Proactive, flexible, open-minded, willing-to-learn and sharing attitude
- Fluency in English; German and/or French would be beneficial

Note: Please send your application online or by mail to the Human Resources Department in Oberursel, Aylin Wölki. For a significant screening of your application documents we require your current CV.
